

# Interpret Climographs

**Directions:** Use the graph below to answer the questions that follow. You may use your textbook for additional help.

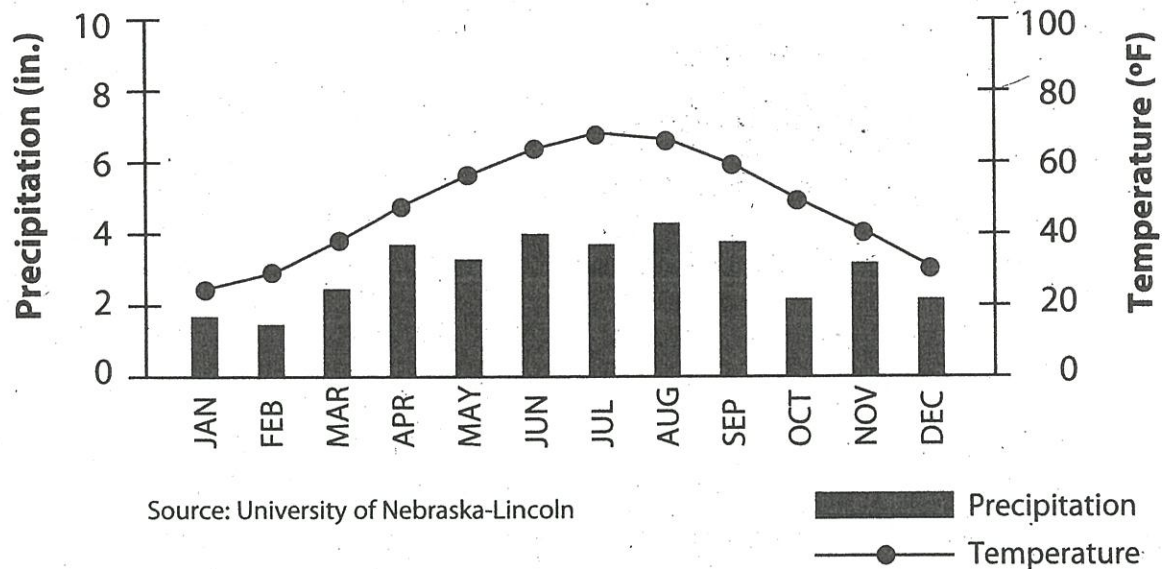

1. What does this climograph show? \_\_\_\_\_  
\_\_\_\_\_
2. Which two months show the most rainfall? \_\_\_\_\_  
\_\_\_\_\_
3. About how many inches of rain does Shenyang receive in September? \_\_\_\_\_  
\_\_\_\_\_
4. What is the average temperature during the month of May? \_\_\_\_\_
5. In what month does the least amount of rain fall? \_\_\_\_\_

# Analyze Climate

This climograph uses a combination of a line graph and a bar graph to give information about Chicago's climate. Use it to answer the questions.

## Chicago, Illinois, Climograph

1. During what two months does Chicago get the least precipitation?

\_\_\_\_\_

2. Based on the average temperatures during the winter in Chicago, what can you predict about the *type* of precipitation the city gets in those months? \_\_\_\_\_

3. Use the graph to write a brief description of the climate in Chicago.

\_\_\_\_\_

\_\_\_\_\_
